

Setup

1. Windows

* ### Download glfw library from <https://www.glfw.org/download.html>. Download *64-bit Windows binaries* from *Windows pre-compiled binaries*. ###

* ### Create **build** and **lib** folder in Code Repo. Put *glfw3.dll* from *lib-mingw-w64* folder of glfw library to **build** and **lib** folder. ###

* ### For C++ compiler and make, Download MSYS2 Package Manager from <https://www.msys2.org/>. ###

* ### Run following commands in MSYS2 terminal: ``pacman -S base-devel`` and ``pacman -S gcc``
.
. ###

* ### add your bin folder (which includes g++.exe and make.exe) PATH (C:\msys64\usr\bin) of msys64 installation directory in your environment variable.

* ### Run ``make win`` in Terminal. ###

* ### ``.exe`` file will be in **build** folder. ###

* ### if your code does not run, then you have to check OpenGL version by installing GLview from <http://www.realtech-vr.com/home/glview>. If your OpenGL version is below 3.3, then update windows.
###

* ### ***if compiler says it cannot find khrplatform.h, then put this file <https://github.com/nahin100/17-CSE4202/blob/main/Lab0/include/khrplatform.h> in *include* folder. Also, change header file statement from ``#include <KHR/khrplatform.h>`` to ``#include "khrplatform.h"`` in *glad.h* file in include folder*** ###

2. Linux

* ### Run following command in Terminal: ``sudo apt-get install libglfw3-dev`` ###

* ### Create **build** and **lib** folder in Code Repo. ###

* ### Run ``make linux`` in terminal. ###

* ### executable file will be in **build** folder. ###
